Imagine a child wants to take off the training wheels to ride a bicycle.

Take so long for the parent to removes the training wheels.

However, it took so long and when the wheels are removed,

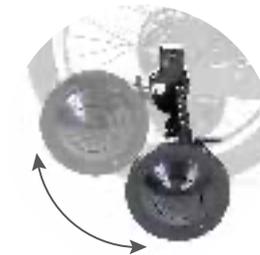

the child may loses the desire to ride.

" WHEELAP™ " can instantly flip up and down,

you can select to keep it as training wheels or not with child condition.

No need the tools to remove, just step on and flip up the wheels,

your child can test ride a bicycle without the wheels any time.
